ORLA MINING LTD.

Notes to the Interim Condensed Financial Statements (unaudited)

For the Nine Months Ended September 30, 2016

(Expressed in Canadian Dollars)

1. CORPORATE INFORMATION AND CONTINUANCE OF OPERATIONS

Orla Mining Ltd. (formerly Red Mile Minerals Corp.) (the "Company") was incorporated under the Business Corporations Act of Alberta on May 31, 2007 as a Capital Pool Company as defined by Policy 2.4 of the TSX Venture Exchange. The Company was continued into British Columbia under the Business Corporations Act in 2010 and subsequently into Ontario under the Business Corporations Act (Ontario) in 2014.

Effective June 12, 2015, the Company changed its name from Red Mile Minerals Corp. to Orla Mining Ltd.

The head office, principal address and records office of the Company are located at Suite 1240, 1140 West Pender Street, Vancouver, British Columbia. The Company's registered office is located at Suite 2100, 40 King Street West, Toronto, Ontario.

These audited financial statements have been prepared on the assumption that the Company will continue as a going concern, meaning it will continue in operation for the foreseeable future and will be able to realize assets and discharge liabilities in the ordinary course of operations. Different bases of measurement may be appropriate if the Company is not expected to continue operations for the foreseeable future. As at September 30, 2016, the Company had not advanced its property to commercial production and is not able to finance day to day activities through operations. The Company's continuation as a going concern is dependent upon the successful results from its mineral property exploration activities and its ability to attain profitable operations and generate funds there from and/or raise equity capital or borrowings sufficient to meet current and future obligations. Management intends to fund operating costs over the next twelve months with cash and cash equivalents and through further equity financings. These factors may cast significant doubt on the Company's ability to continue as a going concern.

The condensed consolidated interim financial statements of the Company for the nine months ended September 30, 2016 were reviewed by the Audit Committee and approved and authorized by the Board of Directors on November 28, 2016.

2. SIGNIFICANT ACCOUNTING POLICIES AND BASIS OF PREPARATION

Statement of compliance to International Financial Reporting Standards

These financial statements comply with International Accounting Standard 34, Interim Financial Reporting.

Basis of presentation

These unaudited condensed interim financial statements include the accounts of Orla. This interim financial report does not include all of the information required of a full annual financial report and is intended to provide users with an update in relation to events and transactions that are significant to an understanding of the changes in financial position and performance of the Company since the end of the last annual reporting period. It is therefore recommended that this financial report be read in conjunction with the annual financial statements of the Company for the year ended December 31, 2015. Certain amounts in prior periods have been reclassified to conform to the current period presentation.

10. SEGMENTED INFORMATION

The Company operates in one reportable segment, being the exploration and development of exploration and evaluation assets. All of the Company's exploration and evaluation assets are located in Canada.

11. CAPITAL MANAGEMENT

The Company defines capital as all components of shareholders' equity. The Company manages its capital structure and makes adjustments to it, based on the funds available to the Company, in order to support the acquisition, exploration and development of mineral properties. The Board of Directors does not establish quantitative return on capital criteria for management, but, rather, relies on the expertise of the Company's management to sustain future development of the business. The Company is not subject to any externally imposed capital requirements.

The properties in which the Company currently has an interest are in the exploration stage; as such, the Company is dependent on external financing to fund its activities. As at September 30, 2016, the Company had capital resources consisting of cash. In order to carry out the planned exploration and pay for administrative costs, the Company will spend its existing working capital and raise additional amounts through share issuances as needed. The Company will continue to assess new properties and seek to acquire an interest in additional properties if it feels there is sufficient geologic or economic potential and if it has adequate financial resources to do so.

Management reviews its capital management approach on an ongoing basis and believes that this approach, given the relative size of the Company, is reasonable. The Company's investment policy is to invest in instruments in high credit quality financial institutions with terms to maturity selected with regards to the expected time of expenditures from continuing operations.

There were no changes to the Company policy for capital management during the nine months ended September 30, 2016.

The carrying values of cash, and accounts payable approximate their fair values due to the relatively short period to maturity of those financial instruments.

	September 30, 2016	December 31, 2015
Financial assets:		
<i>Fair value through profit and loss</i>		
Cash	\$ 3,058,931	\$ 418,703
<i>Fair value through other comprehensive income</i>		
Investment in Pershimco Resources Inc.	3,636,364	-
	\$ 6,695,295	\$ 418,703
Financial liabilities:		
<i>Other financial liabilities</i>		
Accounts payable	\$ 83,845	\$ 49,010
	\$ 83,845	\$ 49,010

Financial instruments recorded at fair value on the statements of financial position are classified using a fair value hierarchy that reflects the significance of the inputs used in making the measurements. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities and the lowest priority to unobservable inputs. The three levels of the fair value hierarchy are as follows:

Level 1: Unadjusted quoted prices in active markets for identical assets or liabilities;

Level 2: Inputs other than quoted prices included in Level 1 that are observable for the asset or liability either directly (i.e., as prices) or indirectly (i.e., derived from prices); and

Level 3: Inputs that are not based on observable market data.

As at September 30, 2016, the financial instruments recorded at fair value on the statement of financial position are cash equivalents which are measured using Level 2 of the fair value hierarchy and investments measured using Level 1 of the fair value hierarchy.

b) Financial risk managementCredit risk

Credit risk is the risk of an unexpected loss if a customer or third party to financial instruments fails to meet its contractual obligations. The Company's exposure to credit risk includes cash and cash equivalents and sales taxes recoverable.

The Company's cash and cash equivalents are held at a large Canadian financial institution in interest bearing accounts. The Company has no investments in asset-backed commercial paper.

The Company's maximum exposure to credit risk is the carrying value of its financial assets.

Management believes that the credit risk related to its cash and cash equivalents and accounts receivable is negligible.

ORLA MINING LTD.**Notes to the Interim Condensed Financial Statements (unaudited)****For the Nine Months Ended September 30, 2016****(Expressed in Canadian Dollars)****12. FINANCIAL INSTRUMENTS (continued)****b) Financial risk management (continued)**Liquidity risk

Liquidity risk is the risk that an entity will encounter difficulty in raising funds to meet commitments associated with financial instruments. The Company manages liquidity by maintaining adequate cash balances to meet liabilities as they become due.

The Company maintained sufficient cash at September 30, 2016 in the amount of \$3,058,931 in order to meet short-term operating requirements. At September 30, 2016, the Company had accounts payable and accrued liabilities of \$220,289. All accounts payable and accrued liabilities are current.

Market risk

The significant market risks to which the Company is exposed are interest rate risk, currency risk and commodity price risk.

Interest rate risk

Interest rate risk is the risk that the fair value or the future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Company's cash and cash equivalents are held mainly in high yield saving accounts and term deposits and therefore there is currently minimal interest rate risk. Because of the short-term nature of these financial instruments, fluctuations in market rates do not have a significant impact on estimated fair values as of September 30, 2016.

The Company's interest rate risk principally arises from the interest rate impact of interest earned on cash. A 1% change in interest rates on cash and cash equivalents outstanding at September 30, 2016 would result in a \$30,589 change to the Company's net loss for the nine months ended September 30, 2016.

Currency risk

The Company is exposed to currency risk to the extent that monetary assets and liabilities held by the Company are not denominated in Canadian dollars. The Company has not entered into any foreign currency contracts to mitigate this risk.

The Company's cash and accounts payable are held in Canadian Dollars ("CAD") and US Dollars ("USD"); therefore, USD accounts are subject to fluctuation against the Canadian dollar.

The Company had the following balances in foreign currency as at September 30, 2016:

	in Canadian dollars		in US dollars	
Cash	\$	2,958,099	\$	76,730
Sales taxes recoverable		12,400		-
Accounts payable and accrued liabilities		(211,526)		(6,668)
Total foreign currencies		2,758,973		70,062
Foreign currency rate		1.000		1.3141
Equivalent to Canadian dollars	\$	2,758,973	\$	92,070

Currency risk (continued)

Based on the above net exposures as at September 30, 2016, and assuming that all other variables remain constant, a 10% appreciation or depreciation of the CAD against the USD by 10% would increase/decrease profit or loss by \$9,207.

Commodity price risk

The Company is exposed to price risk with respect to commodity prices. The Company's ability to raise capital to fund exploration and development activities may be subject to risks associated with fluctuations in the market price of commodities. The Company is not exposed to significant other price risk.
